Control

RWS Design & Controls aligns with our leading OEM Vendor/Partners to provide equipment and spare parts sourcing from your trusted and experienced experts in sanitary processing.

RWS Design & Controls: Stand-Alone Equipment & Spare Parts Division

A single source for spare parts, fittings, equipment and more.

Supplier of Stand-Alone Equipment Components

When you're one of the premier integrators in sanitary processing, the best equipment manufacturers want to be part of the team. This is why RWS is pleased to offer some of the finest equipment components available today from OEM's that are leading the way in technology and reliability. At RWS, we choose our partners carefully and train our staff on the latest technology. You can rely on RWS for the best in equipment components, and to assist in the often-difficult task of selecting a product. Our experienced and professional sales staff is at your disposal to offer our expertise in equipment selection and application suitability.

Supplier of Spare Parts

Not only is RWS recognized as an industry leader in the design and installation of sanitary process systems and automation, we are also your single source supplier for equipment components, sanitary fittings and the spare parts required to keep your process running.

Our team of inside sales professionals is at your service to assist in the right selection of components or spare parts.

REQUEST YOUR QUOTE TODAY!

Trust our years of processing experience and product knowledge to help you make the right choices that will optimize plant production.
